E-Learning: «Agile Leadership»

"Agility" is the answer to ever shorter-term planning processes and ever faster change. "Leadership" must also be rethought in this context. This e-training puts classic leadership tools to the test. It is divided into the areas of mindset (understanding of leadership), skillset (leadership competencies) and toolset (leadership tools). For all three areas, we will examine how thinking and the respective methods and tools must change in order to continue to meet the requirements of successful leadership.

Main topics	**Understanding** the importance of an agile mindset in the workplace
	Distinguishing between mindset, skillset, and toolset
	Learning the most important skills for agile working
	Getting comfortable using the key tools for agile working
Target group	**Experienced leaders**
	Leaders who want to review their methods
	Junior managers
